Back Pain

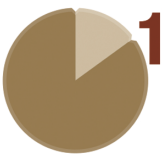

Back pain is a serious issue for many people, regardless of lifestyle or background. Pain can be chronic, nagging, and a serious burden on your life. Nerve problems that have not been addressed by a pain expert are often the cause of back pain.

As fellowship-trained physicians in Pain Management, we are dedicated to helping you resolve your back pain issues without the expense and long recovery of surgery. Our non-surgical, medical treatment plans have excellent success rates.

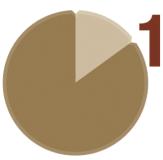

Please call our office at (775) 284-8650 for an appointment with one of our dedicated providers. We are contracted with all insurances.

27% 27% of chronic pain patients suffer from low back pain

15% 15% of chronic pain patients suffer from severe headaches or migraines

15% 15% of chronic pain patients suffer from neck pain

4% 4% of chronic pain patients suffer from facial ache or pain

Physician Leadership

- Dr. Denis Patterson, Board Certified and Fellowship Trained in Pain Management, worked closely with Northern Nevada Medical Center to develop their Pain Management Center.
- As a result, this hospital is the first one in the nation to achieve The Joint Commission's Gold Seal of Approval for treatment of lower back pain.

Our providers use the following interventional treatments:

- Epidurals
- Nerve Blocks
- Medial Branch Blocks
- Nerve Ablations
- Spinal Cord Stimulators
- Trigger Point Injections
- Botox for Migraines
- Minimally Invasive Lumbar Decompression (MILD)®
